

## How you can help us:

You can offer your support in FOUR ways:

- 1:** You may make a donation. You can find the bank account information on this page.
- 2:** You may sponsor a dog. As little as 10 Euro (or more) is enough to sponsor the dog of your choice.
- 3:** Are you looking for a friend for life? Greek dogs are very social dogs, and once you have seen our dogs here at MELIOS, you will lose your heart. Would you like a friend who will be there for you through thick and thin? There are so many furry noses that are waiting just for YOU!
- 4:** Come and visit MELIOS to help us do the work. You may combine it with a nice vacation in Gythio, a very charming town in Greece.

### You can reach us by phone number:

Litsa: 0030 694 510 4421 (GR, UK)

[www.facebook.com/Animal.Protection.Society](https://www.facebook.com/Animal.Protection.Society)

[www.meliosanimalprotection.com](http://www.meliosanimalprotection.com)

### For sponsorships and donations our bank account:

Please support us in our Belgian bank account\*

**The number is:** IBAN: BE76 9731 1080 9295

BIC: ARSP BE22

**To the name of:** Caroline Bossier

**Please mention:** Gift for MELIOS or sponsorship (animal names)

or with  : [paypal.me/meliosanimalhelp](https://paypal.me/meliosanimalhelp)

\* The Greek bank will withdraw 10.- Euro for each transfer.

For this reason, we collect the money in a Belgian account and then transfer it temporarily to the Greek account.

## Animal Protection Society

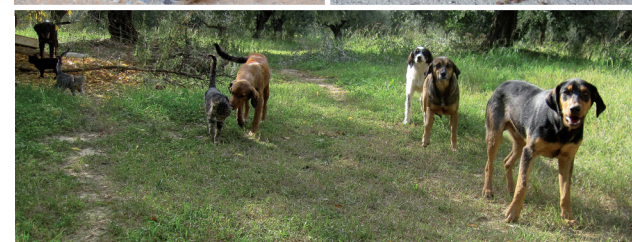

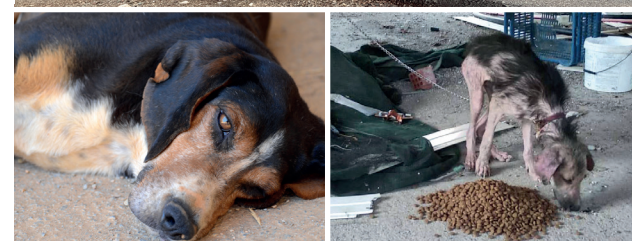

# MELIOS

Gythio, Greece, Non-Profit Organization

We **need** your **Help** and **Support**!

Looking for a great dog? Then you are exactly right here! But also with your donation you can help us urgently.

## Who we are

MELIOS Animal Protection Society in Gythio, Peloponessos, Greece, an animal shelter with currently more than 200 dogs and 30 cats.

In 2010, it was built by two Greek women who were no longer willing to watch the dogs and cats being wounded on the roadside wounded, poisoned, ill-treated or shot dead.

Spaying and castration

## Our shelter

The animal shelter MELIOS had to move twice since the establishment in 2010 due to problems (e.g. poisoning of 28 dogs in one week, hostility of the neighbors). Since November 2013 we are in our current animal shelter.

2010: the first accommodation, an old mill. 2012: at the second stand.

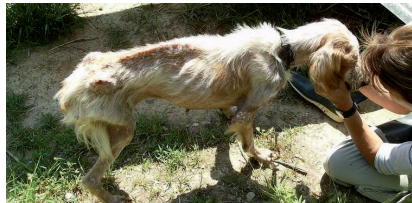

2020: the MELIOS shelter as it currently looks.

## What we do

We take care of neglected, starving, wounded and homeless animals. Wounded and sick dogs get the required medical treatment. Whenever we have enough money, we sterilize dogs and cats. This is a big expense for us, but very necessary and helpful on the long run.

We also try to find good homes for them by hanging up posters and ads in the area. After finding a good place for a dog, we check on it later to see if the dog is fine and treated well. If this is not the case, we take the dog back to us. Would not that be a consideration for you? Our dogs are socially very treatable.

Medical care...

... of gunshot wounds...

...extensive operations...

...sterilizations and castration...

as well as feeding and caring for street dogs.

SINI as an example: When we found her and after we treated her.

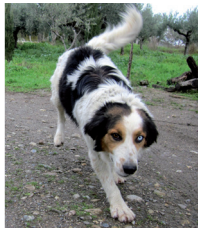

## What we need

Unfortunately, we do not have enough money to sterilize all our animals, to buy all the required medicines, to rescue more animals, make more room for sick, weak or pregnant dogs and young puppies. We particularly need more medicine for leishmaniasis, a very common illness here.

In very clear terms: We would like for our animal shelter to rescue more dogs and cats. It is very painful to refuse an animal in distress simply because we do not have enough space or money.

KOJAK – as we found him with skin problems and healthy and cheerful today.

ANGELOS was found with a wire loop around the abdomen. Today he lives free together with other dogs on a garden plot and is provided daily by us.

Cats are also supplied, sterilized and castrated by us.
